

Murdoch's Wooden Horse on Wheels

An Extension to "Thinking Like Murdoch"

V1.5, Nov. 30/16 (Part "F" – File 17f)

Document Revision History

| Ver # | Date | Description of Changes (Section # and Summary Points) | Author |
|-------|------------|--|--------------|
| 1.0 | Nov. 11/16 | Part A Project introduction and initial version (file 17a) reflecting preliminary design of the crossbar in the master.ipt file | D.B. McCowan |
| 1.1 | Nov. 15/16 | Part B File 17b addresses finishing the crossbar and rear left leg and beginning to break down the vehicle into sub-systems | D.B. McCowan |
| 1.2 | Nov. 22/16 | Part C File 17c begins to address the front end of the Wooden Horse on Wheels | D.B. McCowan |
| 1.3 | Nov. 23/16 | Part D File 17d addresses: -mirroring solids across a plane using Join and New Solid -Make Components: generating individual part files (*.ipt) for each selected solid in any sub-assembly of the Master.ipt file -Generating an *.iam Assembly file: for the entire product or for any particular sub-assembly of solids within the Master.ipt -Generating an *.idw 3-view drawing file: for the entire product or for any particular sub-assembly of solids within the Master.ipt -A high level format for a Design Review. NOTE: You were also given detailed marking schemes: Inventor_Marking_Criteria.doc and MarkingScheme_Probl_Solving_3DCAD.doc -NOTE: DO NOT MAKE ANY DESIGN CHANGES IN ANY FILE OTHER THAN IN THE *.Master.ipt -NOTE: On Nov. 24/16 there will be another Moodle quiz on thinkproblemsolving.org – "Problem Solving and Curriculum Connections" | D.B. McCowan |
| 1.4 | Nov. 29/16 | Part E ... File 17e... Steering Frame Continued... getting ready to integrate the "Driving" subsystem | D.B. McCowan |
| 1.5 | Nov. 30/16 | Part F ... File 17f... Starting to integrate the "Driving" subsystem into the Steering Sub-System | D.B. McCowan |

Resources

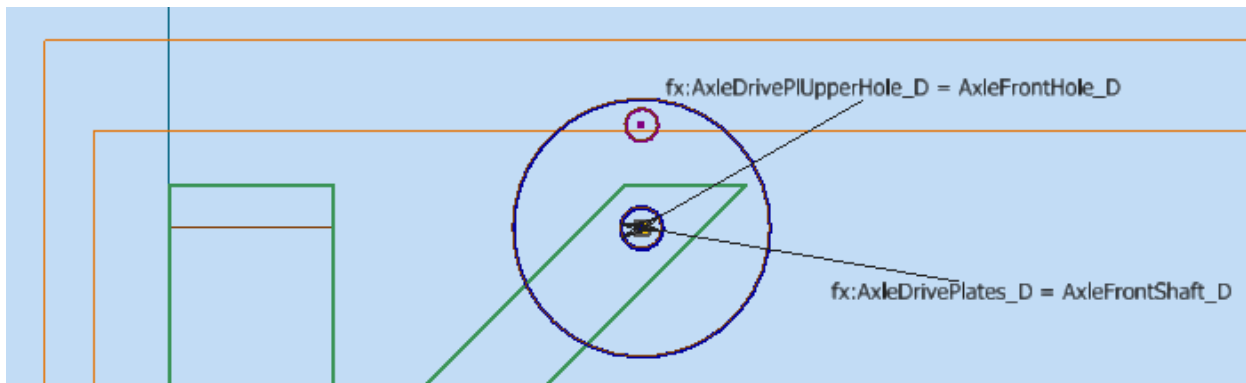

| Reference Document / Filename | Description / Key Concepts | Author | For Vn |
|---------------------------------------|---|--------------|-----------|
| Rubric_Information_Processing.doc | Information Processing is an element of the Thinking Achievement Category | D.B. McCowan | 1 |
| Written_Report_Rubric.doc | Written reports are an element of the Communication Achievement Category (Technical Communication is key) | D.B. McCowan | 1 |
| Inventor_Marking_Criteria.doc | Following best practices for computer aided design (CAD) | D.B. McCowan | 1 |
| MarkingScheme_Probl_Solving 3DCAD.doc | Regarding how thoroughly you solved the Problem during the design stage | D.B. McCowan | 1 |
| thinkproblemsolving.org | TDJ3M Quizzes | D.B. McCowan | 1 |
| Design_Process_Stages_Details.doc | The Design Process – A Problem-Solving Strategy | D.B. McCowan | 1 |

1 “Driving Sub-System” – The Early Steps

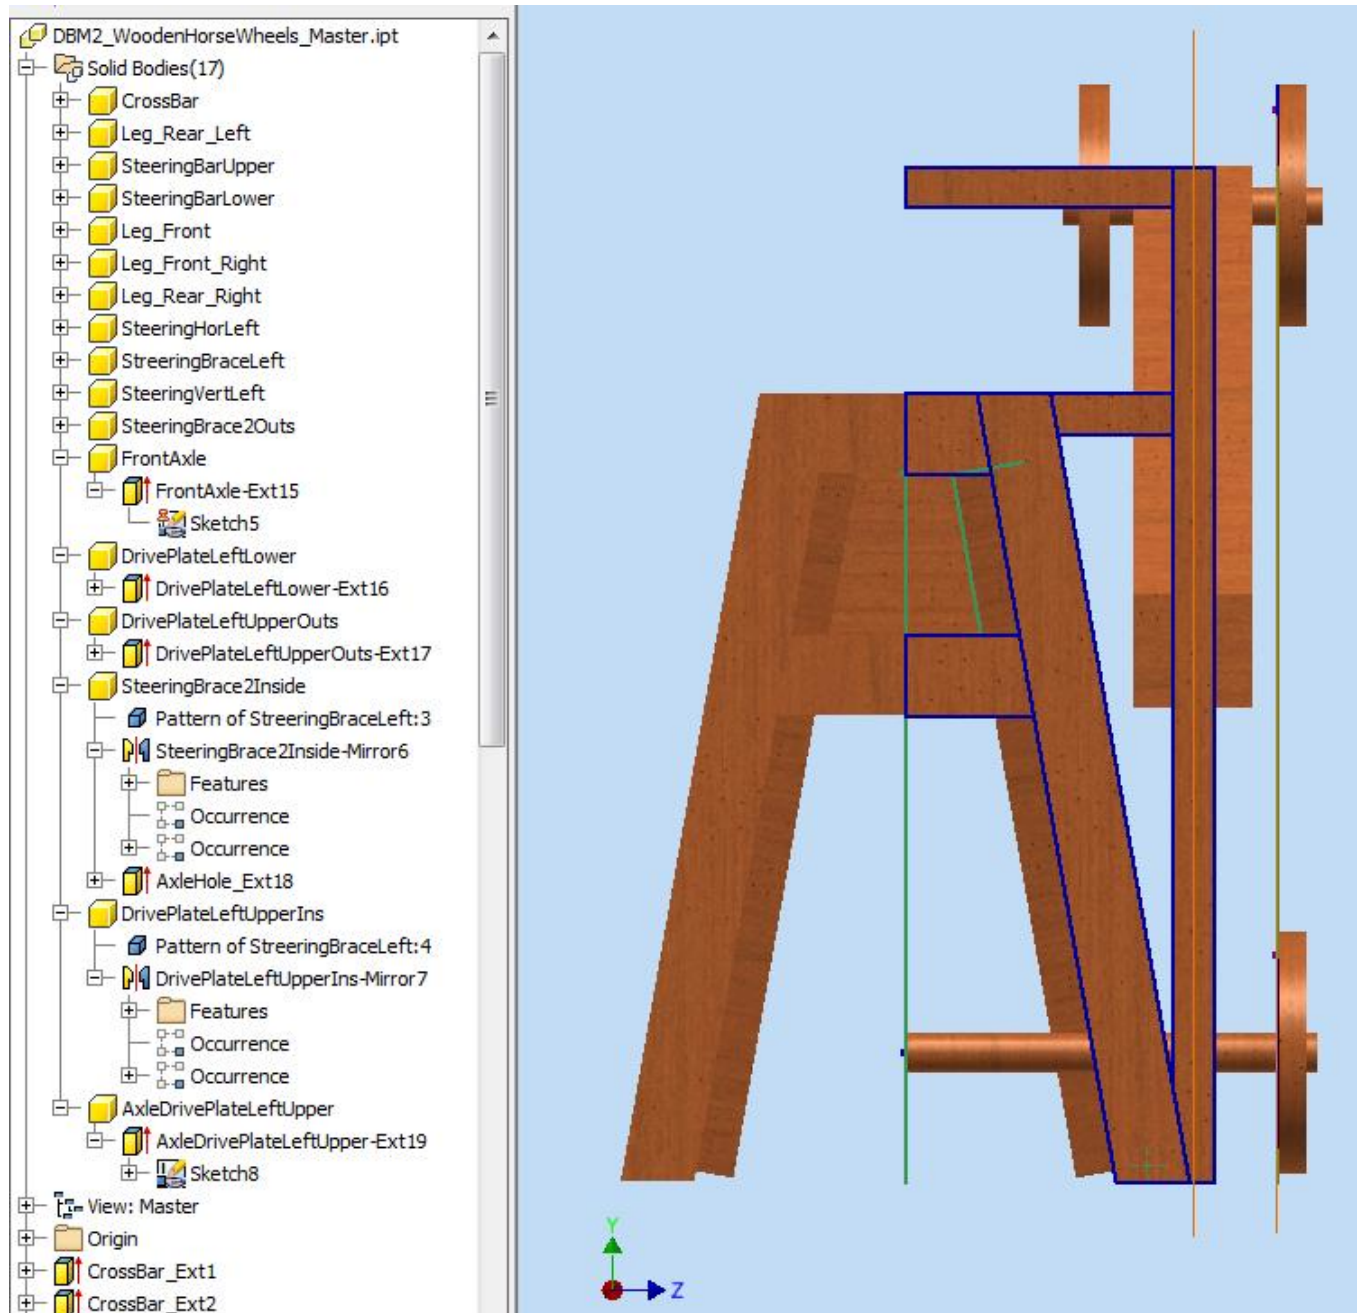

- 1) Two new Workplanes
 - a) DrivePlate_WkPl11_XYOff – offset from the XY plane
 - i) Sketch8 for the outside drive plates

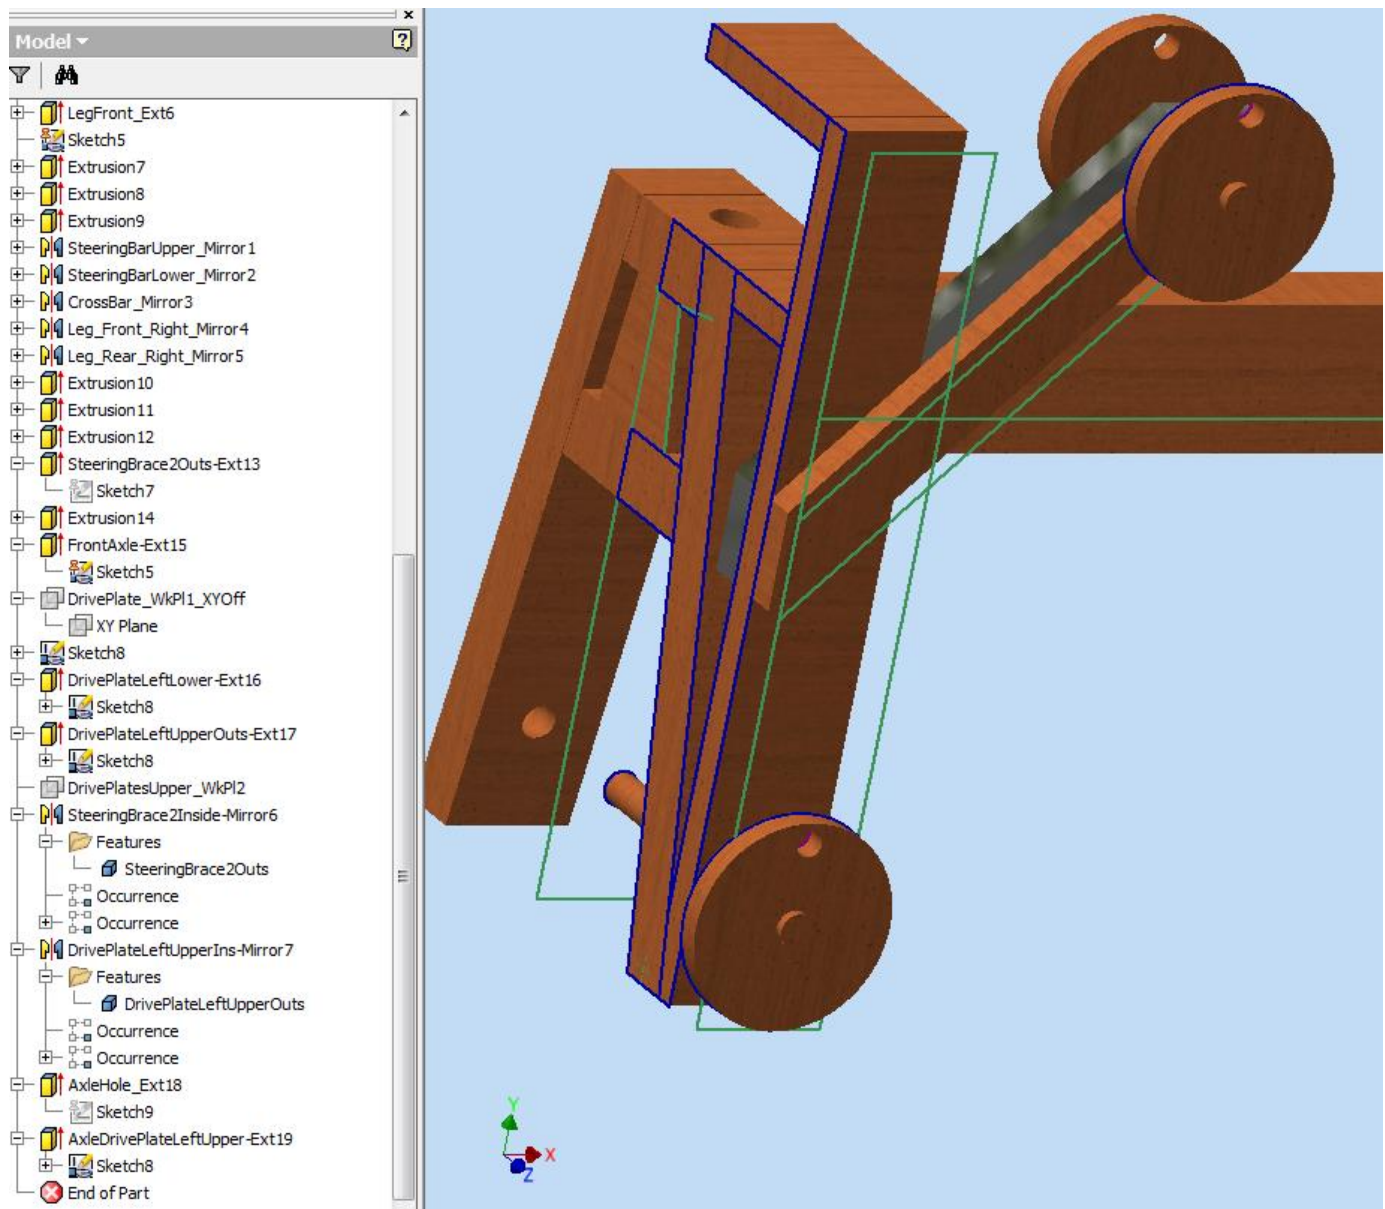

- b) DrivePlatesUpper_WkPl2 – midway between the two parallel faces of SteeringVertLeft
i) Sketch9 for mirroring for the upper inside drive plate and axle

- 2) Note that SteeringBraceLeft has been re-dimensioned so that it moves upwards to allow for the addition of SteeringBrace2Inside
- a) You should be thinking of an improvement in this regard – improved lateral bracing for the “Driving” sub-system
